

## Exchange Email

**B**usiness Class E-mail has become a critical tool in today's interactive world.

The temporary or permanent loss of e-mail can translate into lost revenue, lost customers and an inability to conduct day-to-day business. This is especially true for financial firms who face the unique challenges of a highly distributed workforce of agents who are often outside of the office, in multiple locations or meeting with clients. The productivity of every employee is critical to hitting sales, revenue and margin targets.

Tamarack Management & Consulting is please to offer, as part of our new hosted services products, business-class e-mail based on Microsoft Hosted Exchange, Outlook 2003 and Outlook 2007.

The complexity of maintaining an enterprise e-mail system increases as your employees demand more capabilities and functionality – but the staff, budget and time to operate such a solution are increasingly rare. Best of all, you do not have to commit any technical resources for a business-class e-mail solution. You can re-direct those resources to focus on your core business, while our experts take over administration and support.

With our business-class hosted mail solution based on Microsoft Exchange, you get all of the features of an in house mail solution with none of the operational hassle or costs. To ensure you retain control of such a critical asset, we provide 7x24x365 access to online support, administration and management of mailboxes.

Basic e-mail doesn't offer these capabilities. Our hosted business-class e-mail solution, built on Microsoft Exchange, does. And because it is a hosted solution, your employees will benefit from all of these advanced information sharing and teamwork features wherever they work – at the office, at home, at a client site or on the road.

## Exchange Email
