Tamarack's Data Center and Application Hosting Service

Tamarack Management & Consulting is please to offer our clients, as part of our new hosted services product line the SmartSearch Document Imaging System.

The partnership formed between Tamarack Management & Consulting and Square 9 Softworks has now made available a hosted business-class document imaging system that is affordable to all businesses.

SmartSearch gives business owners the flexibility to utilize their network connected copier, multifunctional product (MFP) or any network device that can send an image to a network directory. Simply scan documents directly into the SmartSearch Inbox from any device where they can be viewed, forwarded to another user, or indexed into an archive file for retrieval at a later date.

SmartSearch was developed to fill the need in the small and medium size business market for a powerful, yet affordable document management solution. SmartSearch empowers these companies with much of the same functionality offered in enterprise level systems used by big business for less than a fraction of the cost.

Our unique software solution is ideal for paper-intensive businesses such as law offices, financial institutions, medical practices, accounting firms, trucking, manufacturing, mortgage and insurance companies that are looking for a cost-effective way to eliminate their paper-based filing systems.

SmartSearch offers our clients the opportunity to incorporate a secure internet based, feature-rich document management solution into your business at a price you can truly afford.

Best of all, no large capital investment, you do not have to commit any technical or business resources for a business-class document imaging solution. You can re-direct those resources to focus on your core business, while our experts take over administration and support.

Tamarack Management & Consulting has taken the complexity out of implementing and maintaining an enterprise class document imaging system by hosting SmartSearch on our servers, in a secure 24x7x365 true data center environment. Our hosting data centers have been engineered to the highest standards, required to support a reliable network with a zero-downtime tolerance. No one can enter the production area of the datacenter without prior clearance and an appropriate escort. Our hosting data centers are SAS 70 compliant and equipped with security card key access, uninterruptable battery power and diesel generators for a consistent 99.99% up time.

To ensure the safety of your imaged documents we back-up all of our client's imaged data daily, online to another data center for fast and easy retrieval if the need arises.

Call Tamarack Management & Consulting today to schedule a demo or learn more about how SmartSearch can help make your staff to work more efficiently and securely as you provide your customers with a higher level of service.

Tamarack Management & Consulting continues to offer a comprehensive line of application hosting and managed services including:

*Exchange/Outlook 2007 Email
Blackberry Service
Calyx Loan Origination Software*
